The Portage management team will participate in one-on-one investor meetings during each of these events. Investors interested in meeting with Portage at the conferences should contact their respective event representative.

About Portage Biotech Inc.

Portage is a clinical-stage immuno-oncology company advancing first-in-class therapies that target known checkpoint resistance pathways to improve long-term treatment response and quality of life in patients with evasive cancers. Portage's access to next-generation technologies coupled with a deep understanding of biological mechanisms enables the identification of the most promising clinical therapies and product development strategies that accelerate these medicines through the translational pipeline. Portage's portfolio consists of six diverse platforms, with lead programs including invariant natural killer T cell (iNKT agonists) and a suite of treatments targeting the adenosine pathway. Additional programs leverage delivery by intratumorals, nanoparticles, liposomes, aptamers, and virus-like particles. Within these six platforms, Portage has 14 products currently in development with multiple clinical readouts expected through the end of 2023.
