NEWS RELEASE

PORTAGE ANNOUNCING RESULTS OF ITS ANNUAL SHAREHOLDER MEETING AND OTHER CORPORATE MATTERS

Toronto, Ontario, April 7, 2016 – Portage Biotech Inc. (“Portage” or “the Company”) (OTC Market: **PTGEF**, Canadian Securities Exchange: **PBT.U**), is pleased to announce the election of Steven Mintz to the Board of Directors at the Company’s Annual and Special Meeting of Shareholders (“ASM”) held on April 6, 2016. Mr. Mintz has been a Chartered Accountant since 1992 and received his BA (Economics and Accounting) from the University of Toronto in 1989. He obtained his Trustee in Bankruptcy license in 1995 and C.A. designation in June of 1992. From 1992 to 1997 he was employed by a boutique bankruptcy and insolvency firm and from 1989 until 1992 he did public accounting at a large accounting firm. Since January 1997 he has been a self-employed financial consultant serving both private individuals and companies as well as public companies in a variety of industries including mining, oil and gas, real estate and investment strategies. He has been a director of two CPCs, which have completed Qualifying Transactions. He has been, and currently is, an officer and director of several publicly traded companies. Mr. Mintz will hold office as a director until the next annual meeting. It is anticipated that Mr. Mintz will be appointed to the Corporation’s audit committee and will qualify as an independent member in accordance with National Instrument 52-110 *Audit Committees*.

Shareholders also approved the following items and resolutions at the ASM:

- the re-election of Dr. Gregory Bailey, Dr. Declan Doogan, Mr. James Mellon and Mr. Kam Shah as directors.
- the appointment of Schwartz Levitsky Feldman LLP as Auditors of the Company.
- the consolidation of the share capital of the Company up to 20:1, if deemed appropriate, at the discretion of the directors of the Company.

Specific details of the matters approved at the ASM are available in the Information Circular dated February 16, 2016, posted on the SEDAR website, www.sedar.com or on the Company’s website at <http://portagebiotech.com/investor-relations/annual-general-meeting-information/agmi-2016/>

The Company closed its private placement raising US\$1 million through issuance of approximately 6.7 million common shares at US\$0.15 each. The common shares issued are subject to restrictions as applicable under the US and Canadian securities laws. The private placement was entirely subscribed by the two directors of the Company.

In connection with the closing of the private placement, Portage issued 333,333 restricted common shares to MediqVentures Ltd as a finders’ fee under a consulting contract. MediqVentures Ltd is owned by two of the Company’s directors.

The proceeds of the private placement were invested in Biohaven Pharmaceutical Holding Company Limited (“Biohaven”) (see our press release of March 23, 2016)

About Biohaven

Biohaven is a privately-held biopharmaceutical company engaged in the identification and development of clinical stage compounds targeting the glutamatergic system. The company has licensed intellectual property from Yale University and Massachusetts General Hospital. The company’s first drug candidate, BHV-0223, is a unique formulation of riluzole, a glutamate modulating agent, that utilizes the Zydis® ODT fast-dissolve technology under an exclusive worldwide agreement with Catalent. Agents that modulate glutamate neurotransmission may have therapeutic potential in multiple disease states involving glutamate dysfunction, including ALS, Alzheimer’s disease, Rett syndrome, dementia, dystonia, tinnitus, anxiety disorders, and affective disorders like major depressive disorder.

Relevant updates in the progress of their programs include:

- a. A Phase 1/2a study designed to assess the safety, tolerability, and pharmacokinetics of single and multiple doses of BHV-0223 in healthy volunteers. Data from this trial will be used to design Phase 2/3 studies in subjects who suffer from anxiety disorders.
- b. Receipt of favorable and productive feedback from their Pre-Investigational New Drug Application (PIND) interaction with the Food and Drug Administration (“FDA”) pertaining to their investigative product, BHV-0223, and the intended initial registrational program under 505(b)2 pathway for the indication of amyotrophic lateral sclerosis (“ALS”). No issues were identified in the FDA response that would impede Biohaven’s planned bioequivalence trial in 2016.
- c. Recently, FDA has granted Biohaven’s orphan drug designation request covering BHV-0223 for the treatment of spinocerebellar ataxia.

Biohaven plans to advance other glutamatergic approaches and is actively exploring licenses for additional compounds.

About Portage:

Portage is engaged in identifying, financing and developing novel therapeutics in indications with high unmet medical need. Portage plans to add 5-7 other opportunities to its portfolio either by direct investment into a company, spinout from academia, or through the creation of an SPV with another company or management team

Apart from Biohaven, Portage also has fully owned subsidiary, Portage Pharmaceuticals Limited (PPL). PPL has successfully validated a new proprietary cell permeable peptide platform technology that has been shown to efficiently deliver an active pharmacological agent or cargo into a cell without disrupting the cell membrane. PPL will be advancing its lead candidate, PPL-003, to an Investigational New Drug (IND) application for the topical treatment of dry eye disease and uveitis. PPL recently completed a study in a rat model of dry eye disease in which a topical PPL-003 solution achieved highly significant efficacy and a more rapid onset of action than topical 0.1% dexamethasone.

Portage has also invested in Sentien Biotechnologies Inc., a Boston based private company developing an extracorporeal bioreactor for the delivery of cell therapies.
